Re: Notification Letter for CLI-CR-19-3.34 (PID 119809) Second Creek Road Reconstruction Project

Dear Neighbor:

The Clinton County Engineer's Office, in partnership with the Ohio Department of Transportation (ODOT), is proposing to reconstruct approximately 1.5 miles of Second Creek Road (County Road 19) from Tar Pike to Shull Road in Marion Township, Clinton County, Ohio. The improvements also include widening the roadway shoulders, modifying ditch slopes, removing fixed objects to increase visibility along the roadway, replacing one culvert and adding wider edge line striping and rumble strips. Construction is currently scheduled to begin in December 2026 and be completed in February 2028.

On behalf of the Clinton County Engineer's Office, we are writing to advise you that it may be necessary for personnel from Clune Consulting Services to enter upon adjacent properties within the next 30 days to obtain specific field data needed in connection with the proposed project. Sections 5517.01 and 163.03 of the Ohio Revised Code authorize such entries but also require that reimbursement be made for any actual damage resulting from such work. It is not anticipated that any physical sampling or vegetation clearing will be required; however, if any valuable vegetation must be cleared to accomplish the work needed, you will be notified and informed as to the procedure to follow in preparing a claim for reimbursement.

Please note that these personnel will not be able to give any information or answers to your questions. The staff will simply be collecting data to complete their environmental studies. If at any time you feel that our representatives have not given proper attention to your property, or should you have any questions regarding this project, please contact our office via the information below.

Adam Fricke
Deputy Engineer
